- Disposable Facial Gown

Surgical drapes are designed to establish and maintain a sterile field. It's important to select a surgical drape that provides reliable performance. To achieve the best surgical outcomes look for surgical drapes with qualities like impervious to strike through, fluid control feature, reliable adhesion, superior strength and comfort.

Design

Mediblu drapes are designed, folded and packed as recommended by The Association of Perioperative Registered Nurses (AORN). Clearly labeled instructions on all drapes to facilitate correct, aseptic and fast application. Wider anaesthesia screen and arm board cover to drape a person from fingertip to fingertip.

Reinforcement

Large impervious reinforcement zone surrounded with fenestrations & splits of each drape. Our reinforcement fabric is highly absorbent to absorb fluids and blood and is plastic backed.

Fluid Containment

In built pouches offered in selected drapes to collect & contain blood and body fluids, minimizing the risk of exposure. Pouches also allow for efficient, easy clean up & fluid management.

Adhesive & Incise

We use premium quality, skin friendly adhesive tape to secure drapes in place without compromising barrier integrity. Incise is included in many procedural drapes such as C- Section drapes, craniotomy drape, open heart drape etc.

Tube & Line Holders

Mediblu drapes feature Velcro style tube and line holders to place surgical lines and tubes and help keep them clear of the fenestration.

Surgical Drapes and Packs

Highlights of Mediblue Drapes

- ▲ Low-linting, non woven, non-absorbent fabric
- ▲ Absorbent only around the fenestration, surgical and critical zone areas, if applicable
- ▲ Soaks up spills and splatters
- ▲ No fluid strike-through
- ▲ Made from absorbent and repellent materials like Kraton, SMS, Polypropylene
- ▲ Continuous broad-spectrum antimicrobial activity in the drape adhesive where it can't be washed away
- ▲ Clinically proven to help reduce the risk of wound contamination and bacterial migration
- ▲ No pinning or clips required

Choice Of Fabrics

In Mediblue you have a choice of surgical drapes and packs in different fabrics available as SMS, Spun lace, laminate without any compromise in quality.

Our range of products include disposable surgical drapes, Disposable surgical Packs, Disposable drapes sheet, sterile surgical drape and many more.

SMMS non-woven fabric

Outerlayer

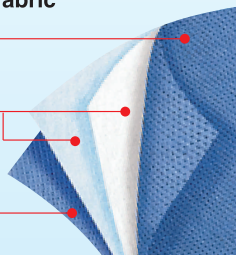

Spunbond repellent fabric

2 Middle layers

Meltblown, fluid control, bacterial barrier

Innerlayer

Spunbond strength

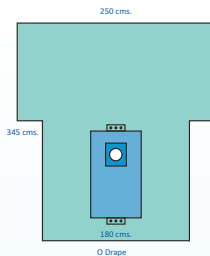

- Lightweight for maximum comfort
- High barrier performance
- Good strength characteristics
- Good breathability
- Low linting
